

## TECHNICAL INFORMATION

When modifying B2-70, B2-100 and B4-200 for using new woofers, the following resistor shall be changed to 10K.

<u>Model</u>	<u>Change resistor</u>	<u>Adjust</u>
B2-70	R414	R415 R <sub>rs</sub>
B2-100	R413	R414 R <sub>rs</sub>
B4-200	R508	R509 R <sub>rs</sub>

The ACE bass circuit must then be adjusted as the graph below.

Check for correct setting of R<sub>rs</sub> as follows:

- Push the cone of forward facing drivers inwards, and release it suddenly.
- Compare the movement of the cone with the curve below, and fine-adjust R<sub>rs</sub> if required.
